Ishmail Beene

Data Analyst

Nashville, TN

615-751-7354

Ishmail.Beene@gmail.com

Profile

Dedicated data analyst with a strong foundation in statistics and hands-on experience in data analysis and visualization. Skilled in leveraging SQL, Python, Tableau, Power BI, Big Query, Data Form, and Agile methodologies to transform complex datasets into actionable insights. Proven ability to support decision-making processes in technical environments, particularly within healthcare and analytics sectors.

Skills

• Data Analysis & Visualization: Power BI, Tableau, Microsoft Excel (Pivot Tables, V-lookups)

• Programming & Scripting: Python (API, Web Scraping, Geospatial Analysis), Shell Scripting

• Database Management: PostgreSQL, SQLAlchemy

• Project & Version Control: Git/GitHub, Jira, SharePoint

• Other Tools: Google Analytics, R Studio, Notion

• Languages: Thai (conversational)

Employment History

Data Analyst II – CereCore , *February 2025 – Present*

• Engineered and refined matching logic across Excel, SQL, and Big Query to support pharmacy charge code validation and formulary alignment during hospital system implementations.

• Built automated flag logic to detect migration status changes, formulary mismatches, and code transitions using advanced SQL techniques including window functions, subqueries, and status tracking logic.

• Developed error-proof Excel workflows with helper columns, conditional formatting, and formula-based extraction to highlight unmatched codes and summarize match counts across multiple sheets.

• Used Big Query to process millions of pharmacy charge code records across 50+ hospital systems, implementing scalable flag logic and validating formulary transitions with performance-focused query design.

• Created custom SQL validation queries and insights dashboards that helped implementation teams reach 98% prework completion (up from 50%), reducing manual QA effort and accelerating go-live readiness.

• Captured and authored business requirement documents (BRDs), current state assessments, and solution design documents, translating stakeholder needs into actionable technical plans.

• Led stakeholder meetings to gather requirements, present findings, and deliver tailored data solutions aligned with pharmacy implementation goals.

• Leveraged Data form and GitHub to orchestrate SQL workflows, manage dependencies, and maintain version-controlled, modular pipelines for pharmacy data validation and reporting. • Collaborated with implementation teams to ensure accurate reporting, visual flagging, and scalable data workflows tailored to hospital pharmacy needs.

Product Analyst – CereCore *March 2024 – February 2025*

• Collaborated with the Application Engineering team to support the GCP migration of hospital data systems, ensuring data integrity and compliance with healthcare standards.

• Utilized Python and relational databases to conduct in-depth analyses of large datasets, identifying root causes of system issues and facilitating data-driven decision-making for accurate issue resolution.

• Engaged with clinical and medical teams to troubleshoot and resolve application-related issues, ensuring seamless operation and continuity in healthcare delivery.

Technical Resident – HCA Healthcare *October 2023 – March 2024*

• Developed and maintained visualizations in Power BI for management, providing insights into service levels and departmental project statuses to optimize operational efficiency.

• Utilized Jira and Service Central for tracking and managing service requests and project progress across multiple teams.

• Administered and managed the team's SharePoint site, ensuring secure access to resources and maintaining up-to-date content for analysts and other stakeholders.

Data Analyst Apprentice – Nashville Software School *May 2023 – August 2023*

• Completed an intensive full-time boot camp focusing on data analytics fundamentals, working with real-world datasets and presenting findings to community stakeholders

. • Analyzed data using Excel and Power Pivot, connected to external data sources, and retrieved data using PostgreSQL.

• Utilized Git/GitHub for version control and project management.

AI Research Assistant Intern – Darvis *February 2022 – April 2022*

• Collected and organized neural network training data using shell scripting, contributing to AI development in logistics and healthcare.

• Facilitated lab demos for stakeholders and maintained accurate project records using Google Docs and Notion.

Youth Development Coordinator – United States Peace Corps *January 2019 – March 2020*

• Conducted data analysis to improve retention rates in Kunpadpeng's education system, utilizing Python and R for data visualization.

• Developed community action plans using SWOT analysis to address issues across various sectors, including education and public health.

Education

B.S. Data Science Oregon State University *Expected Graduation: Winter 2028*

Data Analytics Certificate Nashville Software School *May 2023 – August 2023*

Google Analytics Certificate Coursera *July 2023*
